WINTER SOLSTICE – TUESDAY, DECEMBER 21

The Winter Solstice marks the day with the shortest period of daylight and the longest night of the year (in the Northern Hemisphere), all thanks to the tilt of the earth. In many cultures, the day is a day of feasting and celebration, but even if you're totally agnostic, you can still find a reason to rejoice, because after today, you'll see gradually shorter nights and longer days, which means you can look forward to the emergence of spring.

today,

DON'T LET BLACK ICE SNEAK UP ON YOU

- ◆ Can form on any road, but also along curbs and drainage areas due to melting snow
- ◆ More prevalent at night, but can still be around in the morning
- ◆ Don't drive during freezing temperatures after rain or snowmelt
