9 KITCHEN CLEANING TIPS

1. Kitchen Cabinets

Tidy and organize regularly, tossing any food that is expired.

2. Fridge

There are easily forgotten areas of your refrigerator that you may be neglecting. The top, underneath, and the coils can collect tons of dust and dirt. Wipe down the top, and vacuum the coils in the back, and under the fridge.

3. Inside of dishwasher

Food collects in the trap of your dishwasher, and the walls can get grimy and gross.

4. Wipe down cabinets

Your kitchen cabinets get surprisingly sticky and grimy, and then dust sticks to the stickiness. Paper towel and your favorite all-purpose cleaner should get through the grease and grime.

5. Oven and stove top

The inside of your oven needs a deep cleaning at least twice a year. Food drips onto the bottom, or sticks to the inside of the door, and the heat sets it in.

6. Disinfect garbage cans

Garbage cans get awfully smelly and gross, and it's one of those items we often totally forget to clean. Try using disinfecting wipes to clean and disinfect your trash cans regularly.

7. Microwave

You probably don't give a lot of thought to your microwave until it's time to clean it. If your machine is dusty, the inside is splattered with food, or you notice your food isn't heating as quickly, then it's time to clean!

8. Wipe down walls

The kitchen walls get grimy from cooking, so make sure to clean them regularly using magic eraser.

9. Declutter countertops

Cluttered surfaces make any room look messy. The less you keep on your kitchen counters, the tidier the room will look.

Happy BIRTHDAY To you!
